

ISV Ascalon

A *Challis*-class interceptor commissioned by the Sollar Empire to the [Imperial Red Company](#), renowned for its exceptional speed, stealth, and long-range sublight capabilities. At just 500 feet in length, it is optimized for covert missions, equipped with massive heat sinks to mask thermal emissions and evade detection. Designed to support a crew of ten and carry up to forty additional personnel in fugue creches. Its compact design and advanced maneuverability made it a key asset in many of the Empire's victories.

Often docked aboard the larger [ISV Tamerlane](#).
